EDUCATION

FAST (NUCES)

BS Computer Science (CGPA: 3.05)

Islamabad, Pakistan

09/2021 – 05/2025

TECHNICAL SKILLS

- **Languages:** C/C++, Python, JavaScript
- **Web Development:** HTML, CSS, Node.js, React, Flutter, Express, Ruby on Rails, FlutterFlow, Vue.js
- **Database Management:** MongoDB, SQL, Firebase, PostgreSQL
- **Tools and Platforms:** AWS, Git, Linux, Android Studio, Visual Studio, Vercel, Render, Docker

WORK EXPERIENCE

Full Stack Developer

Work on Mobile Apps

Two.Zero Digital | Barcelona, Spain (Remote)

01/2026 – present

Develop cross platform mobile apps using FlutterFlow, ensuring high performance and responsive UI. Implement full-stack logic and API integrations to enhance application functionality and user experience.

Web Developer Intern

Ruby on Rails Development

ArkHITECH | Islamabad

07/2024 – 08/2024

Contributed to the development of a production-grade full-stack application using Ruby on Rails; added new features and optimized database queries.

Python Developer Intern

Worked on NLP Projects

National Language Promotion Department | Islamabad

07/2023 – 08/2023

Worked on integration and training of multiple text-to-speech models using NLP libraries and created a Django + Streamlit-based web interface for booking appointments and filtering out data from CSV files.

PROJECTS

Quran Echo (Final Year Project)

Full Stack Mobile Application

Python, Flutter, Node.js, MongoDB

- Designed and built an AI-powered mobile app using speech recognition and machine learning to analyze Quran recitation and provide real-time feedback on pronunciation, tajweed and tone.
- Integrated speech processing with Flutter UI and connected to Node.js for user data and analytics.

E-Commerce Clothing Store

Full Stack Web Application

MERN Stack

- Developed and deployed a full-stack e-commerce platform with product catalog, cart, order management, and admin inventory control using MERN stack.
- Implemented secure JWT authentication, integrated GitHub CI/CD for deployment on Vercel (frontend) and Render (backend) and utilized React hooks for state and UI management.

Cafe and Grocery Management System

Database Management System

.NET Framework, SQL

- Created an application for managing inventory, sales, and billing operations in a retail environment.
- Implemented GUI with .NET Windows Forms and optimized backend logic for performance.

CERTIFICATES

- AWS Academy Cloud Foundations
- AWS Academy Cloud Data Pipeline Builder
